

ESP32 Oprating:

1. Download "Arduino IDE".
 2. Open the app.
 3. Go to file -> Preferences -> paste the link in 'Additional Boards Mangers URLs:
'http://dl.espressif.com/dl/package_esp32_index.json'.
 4. Go to Tools -> Board: "Arduino Uno" -> Boards Mangers.
 5. On type write "esp32" , then click on install.
 6. Connect the ESP32 to your device with USB wire.
 7. Go to Tools -> Board: "Arduino Uno" -> ESP32 Arduino -> click on 'WLEMOS D1 MINI ESP32'.
 8. Tools -> Port: "COM3" ->click on "COM3".
- A. Now we want to see if we install the esp32 correct or not:
- A. File -> Examples -> Basic -> click on "Blink".
 - B. Then you will see the code so to run the code just click on "the arrow" you find it on the left side under "Edit".
